41ST IAHR WORLD CONGRESS
SINGAPORE

Hosted by Spain Water and IWHR, China

22 – 27 JUNE 2025

INNOVATIVE WATER ENGINEERING FOR SUSTAINABLE DEVELOPMENT
Invitation to attend the
41st IAHR World Congress in Singapore

The International Association for Hydro-Environment Engineering and Research (IAHR) World Congress is a biennial event that brings together the latest technical and scientific knowledge, practice, trends, and innovations of the global hydro-environment community.

Themed “Innovative Water Engineering for Sustainable Development”, the 41st IAHR World Congress in Singapore will focus on the importance of innovative water engineering towards meeting the Sustainable Development Goals (SDGs) and targets related to water resources.

Held amid the International Decade for Action on “Water for Sustainable Development” 2018–2028, by the UN, the Congress will showcase the role of expert knowledge by the water engineering community to the implementation of innovation solutions to meet the SDGs, and share insights on research, technology and innovations that will create significant impact to tackle global challenges such as climate change and sea level rise.

Themes presented will include:

- Coastal Flooding and Protection
- River and Sediment Engineering
- Eco- and Environmental Hydraulics
- Hydraulic Structures
- Integrated Water Resources Management
- Urban Water Management
- Flood and Drought Management
- Groundwater Management
- Remote Sensing and Field Measurements
- Computational and Experimental methods
- Data-Driven Methods and Machine Learning (Hydroinformatics)
- Digital water
- Nature-based solutions
- Climate mitigation and adaptation

The 41st IAHR World Congress will take place from 22 to 27 June 2025 in Singapore.
